

DHS Worldwide earns Microsoft Gold Certified Partner Status

July 23, 2010— DHS Worldwide Software Solutions, a leading provider of Records and Information Software, is proud to announce achieving Microsoft Gold Certified Partner designation. Gold Certified Partners represent the highest level of competence and expertise in working with Microsoft technologies, and have the highest quality products and services as verified by Microsoft.

Chuck Sowers, Vice President of Sales comments, “DHS Worldwide’ certification shows its commitment to providing its customers with state of the art management software for the Records Management industry. Support for and close integration with Microsoft technologies will help DHS Worldwide customers further leverage their investment for positive returns.”

The stringent application process includes obtaining Microsoft Competencies through progressive individual training and technology certifications as well as submitting products for testing in the Microsoft lab. The certification process also includes demonstrating enterprise customer success stories highlighting how the implementation of DHS Worldwide products, which include Total Recall Records Management Software, Vault Management Software, Destruction Management Software, High Speed Imaging and Scan On Demand, provides real value and a competitive advantage.

As described by Microsoft, Gold Certified Partners are the elite Microsoft Business Partners who earn the highest customer endorsement. They have the knowledge, skills, and commitment to help implement technology solutions that match business needs. Microsoft Gold Certified Partners have passed the highest level of requirements from Microsoft and have demonstrated the most robust, efficient and scalable implementations of Microsoft technologies in demonstrated enterprise customer deployments.

About DHS Worldwide Software Solutions
