

**TOTAL RECALL™**

**Mobile Storage**

## **Go Mobile • Total Recall Mobile Storage Management Software**

With the high demand for a convenient storage solution, the call to Go Mobile is increasing rapidly. Total Recall Mobile, the first software solution developed specifically for mobile storage management, is the most comprehensive software system available. Total Recall manages the full life cycle of your customer relationships from the initial quote to the final invoice. Save time and money by utilizing the fully integrated scheduling and dispatching component to manage all aspects of routing orders – including local, extended and long distance moves. Our integrated zip/postal code price matrix allows an organization to define pricing based on the delivery zip/postal code. The numerous benefits of this true mobile solution are further demonstrated by the streamlined customer order process, including the promotion of fuel efficiencies, through the state-of-the-art fully integrated scheduling and dispatching toolset.

### **TOTAL RECALL KEY FEATURES**

- Quickly create customer quotes using the zip/postal code pricing and container yield management tools.
- Automatically bill credit cards and e-mail invoices.
- Get the advantage of innovative barcode scanning technology and live update of each container's physical location utilizing GPS.
- Increase your effectiveness and profitability with the fully integrated scheduling and dispatching component utilizing Microsoft MapPoint.
- State-of-the-art customer on-line web access provides quotes, account management and easy to use payment features.
- Control all locations in a single Microsoft SQL database. Supports franchises and dealerships.
- Manage your entire organization's operations such as zip/postal code pricing and dispatching from a central location. Global facility updates are instantaneous for all applicable locations.
- Multi-language compatible.
